

Virtual Guide of Poznań

Visit the city in an innovative way – here comes the interactive view on Poznań.

Poznań got the panoramic view on the scale of 21st century. Thanks to the [Visit Poland Online](#) project and its cooperation with [Poznań Tourism Organization](#) we can show you Poznań with a virtual guide.

Visiting the city was never easier. Usage of the drone images allows us to see the panoramic view on the city's most important places comfortably, from more than one perspective. The interactive map presents must sees such as The Old Market Square, former Castle District, Malta Lake or the Old Brewery but also less known like Szachty, Stadium or Freedom Knoll. Creators didn't forget about surroundings – we already get Kórnik Castle, Swarzędz, Tarnowo Podgórne. And we're getting even more soon!

[OPEN FULL VIEW](#)

The views do not only serve as pretty pictures. We are able realistically see where in the labyrinth of streets and squares certain place is located. Display includes museums, tourist attractions, historical places, cultural institutions but also practical points like parkings, shops. We can specifically plan our visit and save time for deserved relax. Easy interface not only takes us from view to a view but helps easily find a spot and quickly check where it is. Also, it navigates to helpful tools – TripAdvisor, Booking.com or Google maps.

Another important element are virtual walks inside the objects. Thanks to that we can verify the standards and decide whether it's suitable or not. And even though on the Poznań views there aren't many of those, the Visit Poland Online proves that it's only the matter of time until more shows up.

We invite you to explore!

View on the Stary Browar and plac Andersa

View on the Plac Wolności
