

Motocross track in Oborniki

The motocross track in Oborniki is the only facility of this type in the region. It was created in the premises of an old aggregates mine after its redeveloping, which makes it a unique motocross track on the national scale.

The track in Oborniki is currently one of the most spectacular and the most beautifully located tracks in Poland. It is perfectly suitable for motor, bicycle and car sports (off-road type), both for pros and amateurs. The route runs in the excavation and through the valley of the Warta river, and the auditorium is situated on a natural slope.
