

Poznań Design Festival: WELLBEING beginnt am 23. September

What is well-being for you? This is the question the organisers of this year's Poznań Design Festival, which will take place from 23 September to 1 October 2022. The programme includes exhibitions, workshops, film screenings, meetings and discussions. This is a great opportunity to find out what design is all about. Especially as participation in the events is free.

During the Poznań Design Festival, local designers, but also guests from Warsaw, Katowice, Krakow and Szczecin, will look at the concept of well-being, which is particularly important in such a dramatically fast-changing reality. This year's theme is intended to encourage reflection on the manifestations of well-being in architecture, in shared and private spaces, and in contact with everyday objects.

The programme includes almost 40 events in five programme blocks: kids design, cinema design, workshops for adults, exhibitions and accompanying events. The event's extensive programme is open to everyone and is free of charge.
