

Goose meat - where to eat a goose in Poznań and its vicinity

We consider the long November weekend to be open! If you managed to satisfy your appetite for croissants, maybe it is worth spending the next days celebrating goose dishes? Poznań restaurants offer this noble, seasonal, autumn delicacy in many interesting versions. The fall menu is great and varied, so use the weekend to find your favorites. Many places have introduced goose menus only for the weekend of November 11-13, so let's do it! Fortunately, there are also restaurants that declare the availability of geese throughout November, and even at the beginning of December.
